

Middle and High School Sports Facility Reviews

Sports plays such an integral role in the overall academic environment and experience for today's youth. It is crucial to maintain and present athletic facilities in a way that demonstrates the school's commitment to excellence to all of its programs. Sports Facility Coach helps school administrators by partnering with them to improve the usage and overall image of their entire athletic complex.

A Sports Facility Review includes an on-site visit to the facilities, a formal analysis and post-visit recommendations.

Project Benefits:

- Identifies potential safety issues that will help to avoid frivolous lawsuits.
- Recommends additional features that would enhance the sporting experience for athletes and their parents.
- Identifies improvements for the purpose of hosting large tournaments such as ingress/egress/parking issues, field conditions, etc.
- Recommendations for change will be prioritized so that the most important and/or quick hit/low cost items can be implemented first.
- A database of all corrections/fixes/enhancements will be provided.

Project Phases:

1. The client will complete a written questionnaire and provide any floor plans and/or drawings (existing or planned).
2. An on-site tour/visit is scheduled with the appropriate school personnel (Principal, Athletic Director, Facilities Director, etc). Photographs will be taken during the review to utilize in the formal analysis. After the tour, a wrap-up meeting will be held with the Administration to discuss initial findings.
3. Within 1-2 weeks after the on-site visit, a formal findings document will be prepared and emailed to the primary contact.

Optional: An on-site presentation of the findings in a formal presentation to school board or other important personnel is available at no additional charge other than travel expenses.
